

MeliBliss

Where the Meliththerapy Ritual *begins*...

Seven formulations built around the rarest honey in the Amazon.
A complete regimen for face and body, where stingless-bee
biology meets nanoencapsulated delivery.

PURE MELIPONA HONEY

AMAZONIAN BIODIVERSITY

REGENERATIVE SKIN SCIENCE

Regenerative Luxury from the Amazon

MeliBliss is a global pioneer in Regenerative Luxury, an expression of beauty that goes beyond clean formulation to actively restore both the skin ecosystem and the natural world its ingredients are drawn from.

At the heart of the brand lies Melitherapy: a ritual of deep regeneration where advanced biology meets expanded consciousness. Inspired by the concept of kosmos, MeliBliss unites the ancestral wisdom of Amazonian Melipona bees with sophisticated delivery technologies such as nanoencapsulation.

Its mission is to restore the balance between skin, self, and ecosystem, transforming Amazonian bioactives into vehicles of vitality, awareness, and positive social impact.

The Hero Ingredient

Honey from stingless *Melipona* bees, foraged across Amazonian flora. Yielded in far smaller quantities than *Apis mellifera* honey, it is exceptionally rich in enzymes, bioactive nutrients, and antioxidants, with superior regenerating and calming properties.

Clean by Subtraction

Innovation here is as much about what is left out. Every formula deliberately **excludes synthetic chemicals**, aggressive preservatives, synthetic fragrance, parabens, phthalates, and sulfates without compromising performance.

Traceable Regeneration

Melipona beekeeping depends on a living rainforest, so sourcing and preservation reinforce one another. The model guarantees ingredient purity while building fair value chains for the communities who tend the hives.

Seven formulations, one ritual.

Four for the face, one mist, one for the body, and one balm for wherever skin asks for it. Combine them freely, the ritual adapts to the skin, not the other way round.

A rhythm, not a rule

The seven formulations are designed to layer, and the pairing below is where most people begin. **Swap**, **skip**, or **add** as skin, season, and climate ask, the ritual is meant to move.

MOMENT	SUGGESTED LAYERING
Morning	Pure Foam → Biome Essence → Vital Infusion → Luster Cream
Evening	Pure Foam → Biome Essence → Nectar Glow
Anytime	Body Mantle + Rescue Balm

One principle holds across every combination: lightest textures first, richest last. Everything else is preference.

The **sacred** geometry

Each formula features its **own icon**, derived from the same visual grammar that informs the brand.

The system stems from the relationship between a **star cluster** and the **stamen of the cupuaçu flower**, two orders that share a center, multiplicity, expansion, and connection.

From these correspondences emerge radial structures, points, orbits, and arabesques.
